

VER-15S

ROOM TEMPERATURE CONTROLLER

3 MM GLASS FRONT PANEL

EXPOSED WALL MOUNTING

Room temperature controller VER-15S

DEDICATED TO:

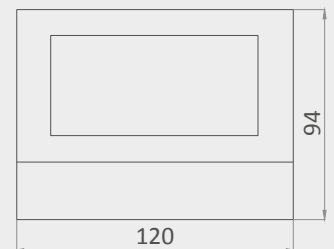

- natural convection heaters (without fan)

AVAILABLE FUNCTIONS:

- room temperature control
- manual operating mode
- day/night operating mode
- weekly operating mode
- Optimum Start function

FEATURES OF CONTROLLER:

- available in white colour
- 3 mm thick glass front panel
- built-in temperature sensor
- battery supply (2 x AA 1,5 V)

The role of the VER-15S room controller is an operation of a natural convection heater (without fan).

The controller maintains the set temperature in the room by closing or opening the 230 V AC or 24 V DC circuit of a two-position actuator (ON / OFF), for example NC type, which results in opening or closing the valve.

The controller is battery supplied (2 x AA 1.5 V).

The controller should be connected to the 230 V AC or 24 V DC power supply circuit of the actuator.

The VER-15S regulator is designed for wall mounting.
